

## Assignment 1

Due date : Friday, Feb 9th by 11:59 PM

Weight: 10%

### Overview

In this assignment, you will be applying concepts learned in the first few lectures to create the following web page

#### Home Page

### The home page

1. Everything within the body should be contained in a div with the id "wrapper"
2. At the very top you should use a header of size 1 to display the main title on the page and should be placed inside a **header** section/container
3. Next, use a navigation section to display the links
4. Next, use a main section to include the following
  - a. You should use a header of size 2 to display "Relax at JJ"
  - b. You should use an unordered list to display the list
  - c. A div to contain the address
5. Use a footer to display the address and copyright section

## Menu Page

## The menu page

1. The page title should be JJ Coffee House Menu
2. Everything within the body should be contained in a div with the id "wrapper"
3. At the very top you should use a header of size 1 to display the main title on the page and should be placed inside a **header** section/container
6. Next, use a navigation section to display the links
7. Next, use a main section to include the following
  - a. You should use a header of size 2 to display "Coffee at JJ"
  - b. You should use definition list to display the definitions listed as per the page shown above
  - c. The definition terms should be displayed in a strong font face
8. Use a footer to display the address and copyright section

Your submission must consist of two parts:

- The html files for the pages above
- A video recording of you illustrating the assignment in your voice.

### Failure to do either will result in a grade of 0

- All files must be wrapped in a zip file and submitted on blackboard by **Friday, Feb 9th, 2024, 11:59 PM**
